

Week No.	Name	Roles	Responsibilities
0	Saif	Prompt Engineer	1. Design and refine prompts used with the AI system. 2. Test different prompt styles to improve responses. Contribution to Quality & Reliability: 1. Improves accuracy of AI responses by giving clear instructions. 2. Reduces confusion by ensuring outputs are easy to understand.
1	Hamad	LLM Systems Designer	1. Design how the AI assistant works (inputs → processing → outputs). 2. Integrate components (LLM, interface, simulated data). Contribution to Quality & Reliability: 1. Ensures the system is well-structured and efficient. 2. Reduces errors by organizing how data is processed.
2	Anas	AI Ethics & Governance Lead	1. Ensure the system follows UAE MOE ethical AI guidelines. 2. Identify risks like bias or misleading information. Contribution to Quality & Reliability: 1. Builds user trust through transparency and honesty. 2. Prevents harmful or biased outputs.

3	Hamad	Data Analyst	1. Create and manage simulated airline data (prices, baggage, routes). 2. Compare existing airline websites and AI tools. Contribution to Quality & Reliability: 1. Ensures the AI uses realistic and relevant data. 2. Improves decision-making support for users.
4	Hamad And Saif	Project Managers	1. Organize tasks and deadlines. 2. Ensure all project requirements are completed. Contribution to Quality & Reliability: 1. Keeps the project organized and on time. 2. Improves overall quality through structured planning.
5	Anas	Research Specialist	1. Study existing airline websites and AI travel assistants. 2. Compare advantages and disadvantages of AI vs traditional systems. Contribution to Quality & Reliability: 1. Provides strong evidence for your project. 2. Ensures the solution is based on real-world problems.

6	Anas And Hamad	UI/UX Designers	1. Design the interface (screens, chatbot layout, buttons). 2. Make information simple and easy to read. Contribution to Quality & Reliability: 1. Improves user understanding and experience. 2. Supports digital wellbeing (less stress when booking).
7	Saif	Decision Support Specialist	1. Help design how the AI recommends flights. 2. Create comparison logic (price vs baggage vs timing). Contribution to Quality & Reliability: 1. Improves decision-making clarity for users. 2. Prevents biased or confusing recommendations.
