

Activity 2.3.2: Define user requirements

Identify who the users of your solution are.

For each user group:

- List their key needs (for example: ease of use, accessibility, language, safety).
- Decide which needs are **mandatory** and which are **optional**.

Record your answers in the table provided.

Users	Needs	Mandatory / Optional
Families travelling together	Compare prices for multiple passengers, clear baggage information, child-friendly travel options, seating together	Mandatory
Elderly travellers	Large text, simple instructions, assistance with wheelchair requests, easy booking steps	Mandatory
People with disabilities / special needs	Accessibility support (wheelchair assistance, medical equipment allowance, priority boarding info)	Mandatory
