

Deep Web

Deep Web

RED
nexus

- Deep Web can only be accessed by TOR browser

Deep Web

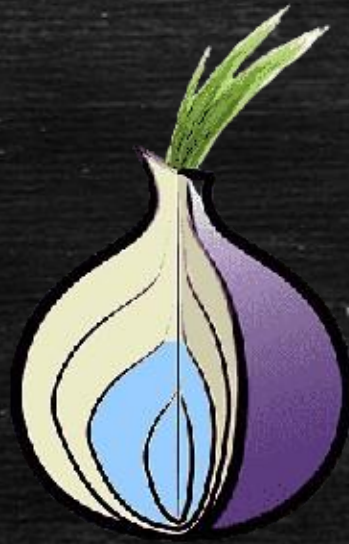

RED
nexus

- TOR browser is special as it has layers of encryption and proxy chains which changes the location and the identity of the user many times
- Suppose that you are entering the deep web from Egypt then your location will be changed to many countries then access the site to make it impossible to follow you inside deep web

Deep Web

- Deep web sites are all with TLD .onion for indication to the onion layers

Deep Web

- First you need to download TOR browser from <https://www.torproject.org/>
- If you using windows then you need windows version and if you are using linux then you can click on linux download

Deep Web

RED

[Download the latest alpha build](#)

[Download Tor](#)

Deep Web

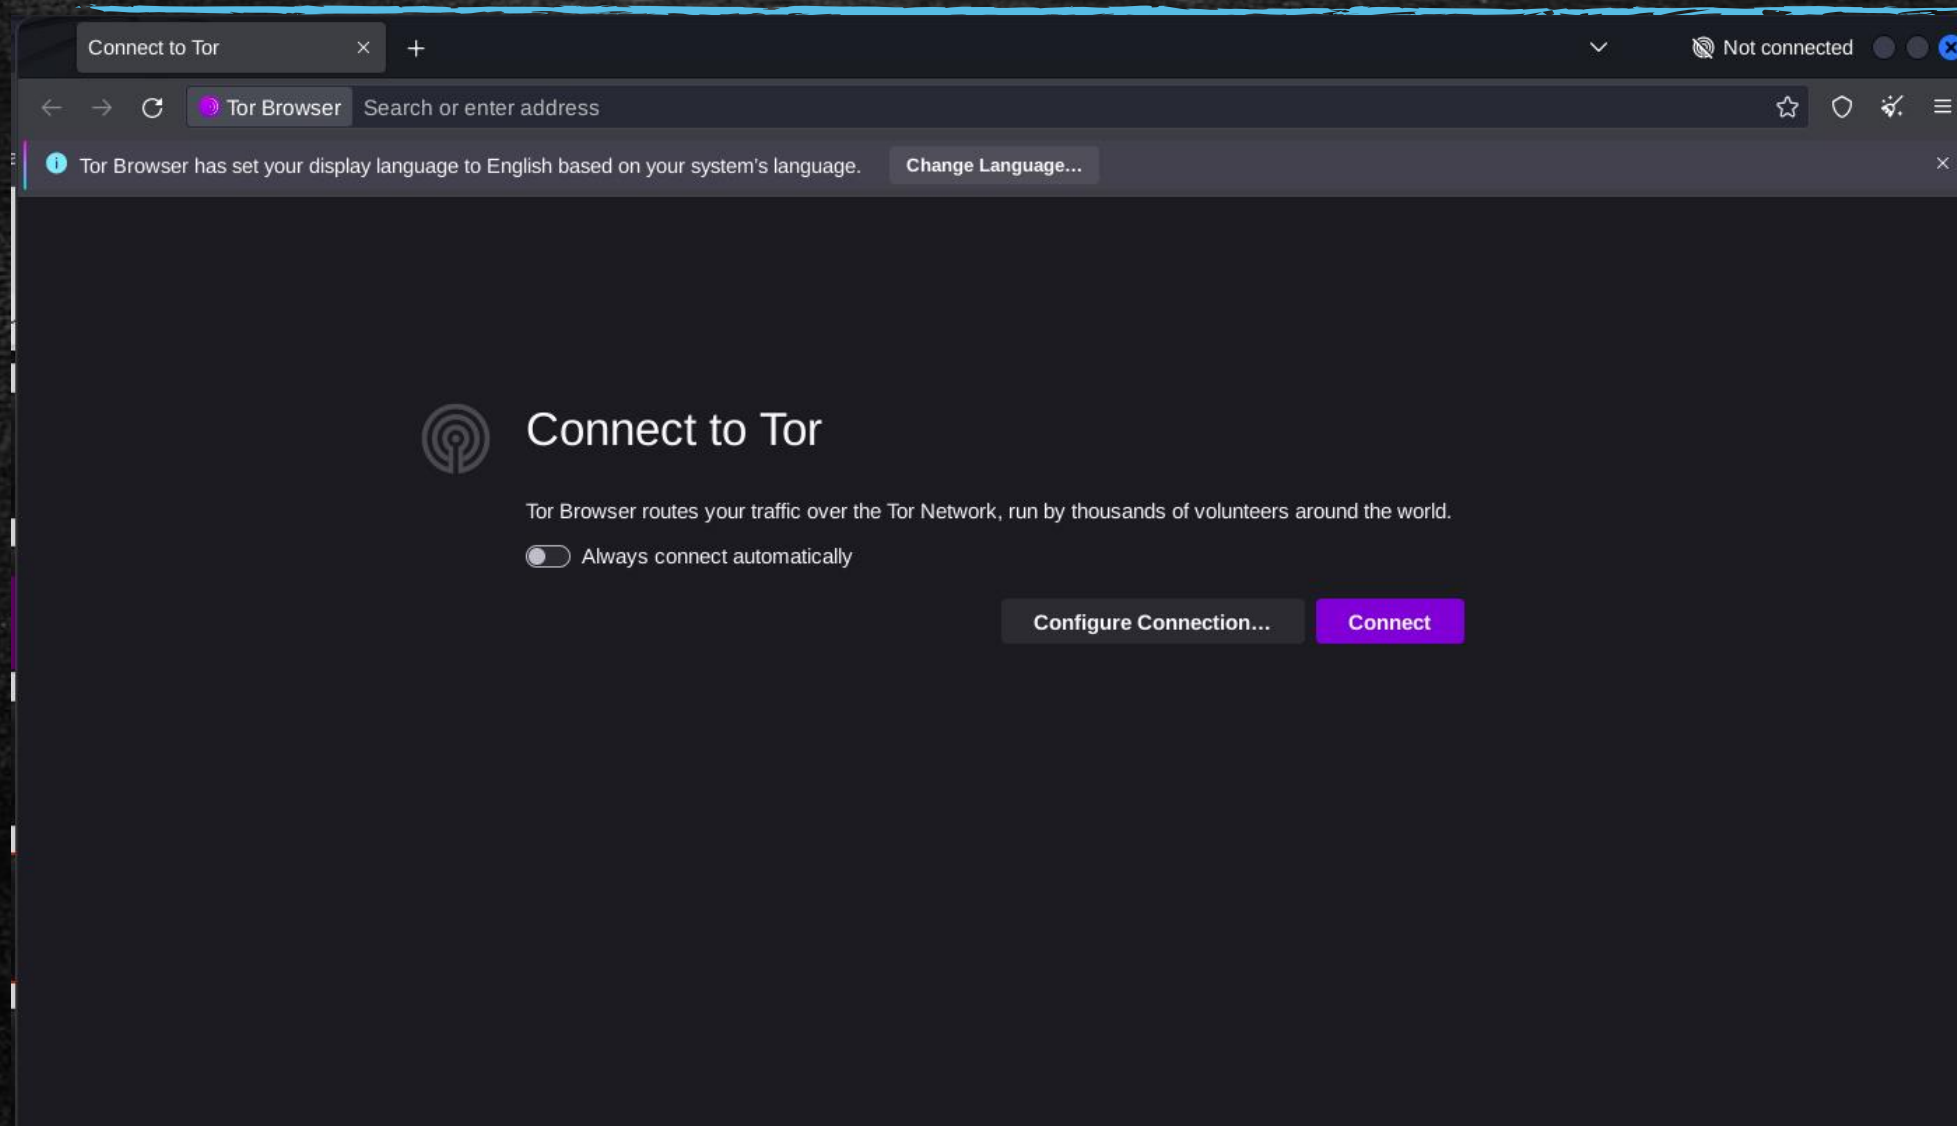

- If you are using linux OS then go to terminal and
- # sudo apt install tor
- # apt install torbrowser-launcher

- Or if you downloaded it from the site then
- # tar xzf tor-*; cd tor-*
- # ./configure && make
